

## THE NATIONAL NGV FLEET SUMMIT - March 24, 2010, Louisville, Kentucky

**WHAT:** The National NGV Fleet Summit will offer an intensive day of sessions featuring high level representatives from some of the nation's top fleets talking about their experience using natural gas in their own operations. Opportunities and pitfalls will be discussed as well as their motivations for choosing natural gas, the grants and incentives they have been able to leverage, and other key issues. Energy suppliers will answer questions about supply, infrastructure, and the technologies that make natural gas a real alternative fuel option for heavy-duty applications. Vehicle technologies and new NGV equipment will be displayed at the event tradeshow and during a Ride & Drive.

**WHY:** The use of natural gas fuel in heavy-duty fleet operations continues to grow rapidly in the U.S. and even more so around the world. There is more equipment, more funding, and more reasons than ever to look at natural gas as a fuel in trucking operations. The goal of the National NGV Fleet Summit is to create a true "one stop shop" and provide fleets with a comprehensive look at the information they need to know in order to develop their own project. Equipment options, infrastructure requirements, and case studies will all be examined in an atmosphere of real information exchange.

**WHO:** Expected attendees will include fleet managers, procurement specialists, maintenance directors, equipment manufacturers, technology providers, natural gas suppliers, infrastructure developers, engineers, academic researchers, funding program representatives, community members, environmental organizations, media representatives, and many others.

**WHEN:** Wednesday, March 24, 2010, 8:00am -6:00pm

This event will take place the day before the opening of the Mid-America Trucking Show, the largest heavy-duty trucking event of the year. The National NGV Fleet Summit will be an intimate event compared to the Trucking Show however—we're getting down to the details and discussing what it really takes to get "wheels on the ground" with NGV deployment.

**WHERE:** Crowne Plaza Hotel Louisville Airport  
830 Phillips Lane, Louisville, KY 40209  
502.367.2251, [www.cplouisville.com](http://www.cplouisville.com)

### AGENDA TOPICS:

- Legislative updates on the NAT GAS Act
- Latest natural gas truck equipment offerings
- Success stories from large fleets including UPS, Waste Management, and HEB Grocery
- Natural Gas fueling infrastructure and station development
- Learn how natural gas trucks reduce greenhouse gas emissions compared to diesel
- Understanding of North American Natural Gas Supplies
